

# Quick Reference Guide for UniSafe® 1mL Auto-injector

## UniSafe® 1mL Auto-injector

**UniSafe® 1mL safety syringe**  
Use this syringe type only with your UniSafe® 1mL Auto-injector.

**Do NOT remove the needle cap with your hands.**

**Device door**  
Ensure this is open all the way.

**Device door buttons**  
Press both to open the door.

## Before you start

1. Remove the safety syringe from fridge **30 minutes before** you are ready to inject.
2. Inspect the medicine inside the safety syringe. It should be clear and colourless. There may be a small bubble.

**⚠ Do not use if the medicine looks coloured or if it has any particles in it.**

3. Check the name of the medicine on the safety syringe or label to make sure it is the correct one. Check the expiry date on the safety syringe label.

**⚠ Do not use if it is past the expiry date.**

## Preparation

Wash your hands with soap and water.

Choose your injection site.  
Back of the arms (for caregivers)  
Stomach area  
Thighs

**⚠ Do not inject into areas that are red, hard, bruised, or tender.**

Expose your injection site and wipe the skin with an alcohol swab.

## Preparing your UniSafe® 1mL Auto-injector

**1. Press buttons**  
Press both buttons at the side of the device and lift door upwards.

**2. Open door**  
Open the door all the way until it **LOCKS** into place.

**3. Insert syringe**  
Place your safety syringe inside the auto-injector.

**Do not remove the needle cap with your hands.**

**4. Close door**  
Close the door all the way until it clicks into place.

**5. Pull cap remover**  
Pull the needle cap remover from the auto-injector.

**6. Put needle cap into bin**  
Put the needle cap into a bin.

**Do not throw away needle cap remover.**

## Injecting your medicine

### 1. Position

Hold the auto-injector at **90°** to the injection site.

Keep the injection wheel facing towards you, if possible.

Push down and keep holding down

### 2a. Push down and keep **HOLDING** down to start the injection.

You will see the injection wheel rotate around. This could take up to 10 seconds.

**2b.** You will hear the auto-injector **BEEP** and see it **FLASH GREEN** twice. Check the viewing window is yellow.

### 3. Remove

Once the auto-injector has **BEEPED** twice lift straight off.

The needle will be safely covered.

### 4. Open door

Open the auto-injector door all the way.

Remove the safety syringe from the auto-injector.

### 5. Throw away

Put the used safety syringe into a sharps container.

Close the UniSafe® 1mL Auto-injector door and place the needle cap remover back onto the device.

## Failed injection

If a **FLASHING RED** light appears during the injection something has gone wrong.

### 1. Lift device from injection site.

⚠ **Do not** attempt to inject again. Contact your nurse / doctor.

### 2. Carefully remove the syringe from the auto-injector.

⚠ **Do not** touch the needle end of the syringe.

### 3. Put the used safety syringe into a sharps container.

**Attempt to inject again at your next scheduled injection only.**

## Low battery alert

When it is nearing its end of life, UniSafe® 1mL Auto-injector will show a **SOLID YELLOW** light after you inject. This means the battery is low.

The expected lifetime for UniSafe® 1mL Auto-injector with normal use is up to 3 years, after which it must be replaced.

As soon as you see this yellow light contact your healthcare provider or local helpline for a replacement.
